December 2024

1 SPACE IS THE MULTIUNIVERSE

1.1 exploring the space is the big task. major is 1.time taken 2. expensive

SPACE RACE 1.SPACE RACE BEGIN 1940 TO 1950 Our solar system consists of the sun and everything that orbits that sun, like the eight (once nine) planets we all know from elementary school. But the main planets, as diverse and fascinating as they are, are just the beginning. Earth's neighbors in space include comets, asteroids, dwarf planets, mysterious moons and a host of strange phenomena that are so out-of-this-world they elude explanation
